

## Business Pioneers: Drivers of Success

## Global Leaders: Change Makers of Tomorrow

Intake

1

30 June to  
13 July

**lottie**

This session will be presented by Chris Donnelly, the charismatic and inspirational founder of Lottie, a care-home finding service. The visit will explore his personal entrepreneurship journey, providing detailed business advice, how he sold his first business as a teenager and insight into the highs and lows of running a business.

## Global Leaders: Change Makers of Tomorrow

**captur**

Explore Captur, the ground-breaking platform offering real-time image verification for mobile apps. Learn how clients can confidently develop, reduce fraud, and gamify user experiences without custom models, and the implications for ethical business practice in the future.

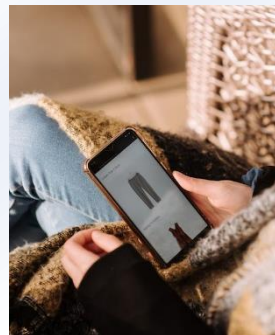

Intake

2

14 July to  
27 July

During your visit, you'll delve into the world of Loke, exploring its cutting-edge payment super-app that operates globally. Gain insights into AI-driven target marketing strategies used to retain customers for clients. Discover how, unlike other loyalty services, Loke not only offers discounts but also enables customers to make payments within the app.

**LOKE**

Embark on a 2-hour visit to Fashion-Enter Ltd for a comprehensive exploration of UK garment manufacturing, technology-driven efficiency, and ethical business practices. Witness the production line, seam stressing, and digital CAD processes. All proceeds support the non-profit Fashion Academy, making it ideal for Fashion, Business, or Sustainability students.

Intake

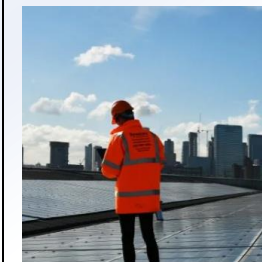

3

28 July to  
10 August

**lottie**

This session will be presented by Chris Donnelly, the charismatic and inspirational founder of Lottie, a care-home finding service. The visit will explore his personal entrepreneurship journey, providing detailed business advice, how he sold his first business as a teenager and insight into the highs and lows of running a business.

**Bywaters**  
recycling made easy

Go on a transformative learning experience at Bywaters, where students delve into the core of sustainable waste management. Explore cutting-edge solutions at the solar-powered Bow facility, processing vast waste volumes and propelling London towards sustainability. Gain insights into efficient waste management strategies, from local cafes to international corporations.
